TECHNICAL //

Able to create and maintain a database
using SQL

Able to create RESTful APIs
(experience in PHP, ASP.NET/C#)

Able to develop responsive, mobile-
first websites using a combination of
technologies such as HTML, CSS, JS,
React, jQuery and Bootstrap

Able to plan out a project using a
variety of Object Oriented
methodologies using UML diagrams

PROFILE

Noah found his passion for computers after high school. It wasn't until he was studying business at McMaster that he got his first computer. As soon as he saw his first terminal and entered his first commands using the Bash shell, he was hooked.

Not long after, he had fallen down the rabbit hole that was GNU/Linux, compiled his first kernel, and discovered he wanted to pursue software development and computer science as a career.

PROJECTS

USER AUTHENTICATION API // [VIEW IT ON GITHUB](#)

Written in PHP, uses MySQL database
